# Biofaser

## At home with nature

**A material that stands for healthy living both at work and home. A result of decades of commitment to sustainability.**

Long before sustainability became a 'buzz word' within the industry, FunderMax developed Biofaser, an organic fibreboard, which to this day is created from fresh wood in a wet fabrication process according to standard EN 622-2 (corresponds to type HB).

Biofaser is suitable for universal use in interior applications without special strength requirements. Due to our unique production process, FunderMax is able to eliminate the use of synthetic resins almost entirely. In its raw state, the board has a smooth top and a dimpled structure to the back.

To increase the resilience of the Biofaser board, the surface can be coated with melamine resin paper, varnish or foil.

### **The advantages:**

- ➡ versatile – wide range of applications
- ➡ easy to process
- ➡ made from natural and renewable raw materials
- ➡ formaldehyde content is comparable to natural wood
- ➡ easy disposal
