What We Do

Leading Manufacturer of Table Bases & Sofa Legs

www.erafittingsco.com

The Catalogue is available for download at www.erafittingsco.com

All Product Designs contained in this Catalog are exclusive of ERA Furniture Fittings Co.

The Trade Marks and Logos are registered and they are property of ERA

ERA reserves the right to make all the suitable modifications (materials, finishes and dimensions) of all products present in this catalogue without previous notice. Colors of materials and finishes are indicative and they are depending on the tolerances of the printing process.

We are guided and inspired by our Vision...

From steel revolution to product evolution

We had began by making regular Table Legs from only tubes within very limited models years ago and developed our work and models each year and quickly became one of the best manufacturer in Turkey. From the outset , ERA was an export-oriented company and that caused to large orders starting from local market and than expanded all over the world . Along with developments and new trends in Entertainment , Home , Office and Outdoor Furnitures , ERA kept creating new models based on worldwide trends and requests received.

Innovation and diversification

After years , we began to receive customized demands for all indoor decorations of restaurants , homes , offices and some other similar projects. These demands led to diversify our product range and to systematically develop new designs. During this period, sales organizations were established all over Turkey and in some countries in Europe , Usa , North Africa , Middle East and Far East

Innovation and your life

We kept re-affirming our long - standing commitment to improving people's lives through meaningful innovation with the launch of our new models every year for Homes , Offices , Restaurants , Hotels ... ERA deliver innovation that matters to you . Our " innovation and your life " brand line is the simplest distillation of our brand promise. It encapsulates the magic of innovation that makes a meaningful difference to people's lives.

Our strategic focus - driving value creation

Today, ERA is a leading " Leg " manufacturer company focused on improving people's indoor and outdoor life and enabling better outcomes across the decoration continuum – thereby creating value for its customers.

Businesses bringing innovations to market

With our focus on delivering meaningful innovations , we serve both professional and consumer markets in the areas of Furniture Manufacturers , DIY Stores , Architects , Wholesalers , Project Companies , Hotels , Restaurants , Coffee Shops , Malls ... We are a leader in manufacturing different kind of customized designs to be made of steel .

Value-adding relationships with supply partners

We also work closely together with our raw material suppliers, supporting them in their efforts to improve their operational and sustainability performance. We also involve them at an early stage of the design process , to help us innovate quickly and fulfill our customers' expectations.

Are you an innovative company interested in collaborating with ERA ?

This new CATALOGUE presents and offers you new products for your further reference both in resale and / or in using them in your furnitures . **So , let's enhance our growth prospects by innovating together!**

Customized Product Development ;

WE ARE YOUR PARTNER

from the idea through the development , production and delivery phases
and we will gladly work out a solution together with you...

As an advisory and solution-oriented manufacturing partner , we put the customer requirements first . Through dialog , knowledge sharing and a close collaboration , we will find value adding solutions to challenges and needs in terms of both development and business...

We listen to your needs and spend time understanding the ins and outs of your product budget, timeline and manufacturing methods so we can align on a solution that works for you.

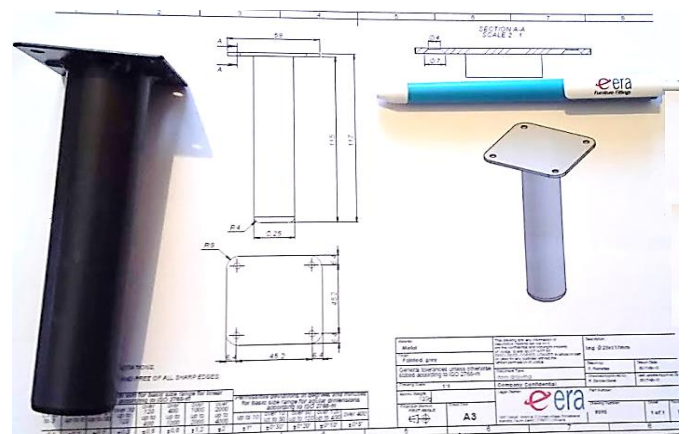

We move to the table where the design and concept begin to take shape. This is a phase where we define and answer open questions & refining ideas as needed and finally applying the design for manufacturing.

As your ideas come to life, together we'll review the solution. Details can (and will) be revised to make sure your goals are met and your expectations are beyond exceeded As it makes sense to test product before production , custom projects won't move to the manufacturing stage without any approval.

With the prototype complete, our next step is to build your custom model. Once we cut, mold, weld and provide the appropriate materials, we will carefully assemble, inspect, pack and prepare your order so it can be shipped to you and your customers.

It is finally time for the world to see your new products ! We will look forward to receiving your new orders and projects very soon...
